EXPERIENCE

Data Research Assistant ,Jadavpur University, Department of Computer Science Jan 2025 - Oct 2025

- Engaged in end-to-end data collection processes using qualitative and quantitative methods for 10+ research projects.
- Analyzed quantitative data with a 7-man research team and presented results through 30 written publications and 20+ oral presentations.
- Managed the company's \$10K research equipment and trained 60+ undergraduate students on properly using it.
- Assisted in developing 10+ new papers that the department released to the public in 2025.

PROJECTS

Marketing Analytics

- Collected and unified marketing datasets from diverse inputs such as SQL tables and CSV files, maintaining high standards of data quality and reliability.
- Performed exploratory analysis and text-based sentiment evaluation in Python to identify customer perception patterns, engagement behavior, and overall campaign impact.
- Built a dynamic Power BI dashboard showcasing essential marketing metrics, supporting stakeholders with clear visual insights and informed decision-making.

Attrition Analytics

- Designed an interactive Power BI dashboard showcasing attrition, hiring, and diversity metrics.
- Performed data cleaning, transformation, and modeling in Excel and Power BI.
- Used data modeling and relationships to connect multiple HR datasets (employee info, performance, attendance).
- Delivered actionable insights that helped HR identify high-risk departments and improve retention strategies.
