leetcode.com/u/TRISHADEBNATH | thetailorcv.com/trisha-debnath-30 | Kolkata, West Bengal

Technical Skills

Languages: JavaScript, HTML, CSS, Python, SQL
AI/ML: scikit-learn, TensorFlow, Machine learning, RAG, LLM
Frameworks/Libraries: FastAPI, Pandas, NumPy, Matplotlib, Seaborn
Databases: PostgreSQL, MySQL
Tools & Platforms: Playwright, Sentry, PostHog, Power BI, Git, Excel
Cloud & DevOps: Netlify
Networking & Protocols: SMTP
Other Technical Skills: DOM manipulation, Data Structures and Algorithms, Data Analysis

Experience

Berger Paints *4 jun, 2026 - 4 july,2026*
Engineering Trainee *Rishra, Howrah*

- Mapped the end-to-end paint manufacturing workflow, documenting production planning, raw material handling, process optimisation and quality control practices observed on the shop floor.
- Assessed procurement, inventory control and warehouse management systems (WMS), detailing material sourcing, stock control procedures and warehouse operations to highlight supply-chain bottlenecks.
- Analysed manufacturing and supply-chain operations by observing chemical processes, compiling a comprehensive technical report with process flow diagrams and concrete recommendations for operational improvements.

Outlier *May 2026 to June 2026*
Python Engineer *Remote*

- Evaluated AI-generated Python code fixes across 50+ GitHub repositories, applying a 10-metric rubric that measured correctness, reasoning, code quality and task completion to benchmark frontier LLM performance.
- Diagnosed recurring failure modes — hallucinations, root-cause analysis gaps, incomplete implementations and code-quality regressions — and fed those findings into model evaluation criteria that led to a 15% improvement in model accuracy.
- Reviewed and annotated Python coding tasks by assessing solution correctness, reasoning quality, and adherence to best coding practices, improving the consistency and reliability of LLM evaluation.

Projects

Tailorcv.com / *html,css,javascript,FastApi Link↗ / GitHub↗* *Feb 2026*

- Built and scaled an AI resume-optimization platform to 16,000+ users across 30+ countries and 150+ daily active users, owning the full stack in Python/FastAPI on Neon PostgreSQL to deliver ATS scoring, resume tailoring, portfolio hosting, cover letter generation and AI mock interviews.
- Engineered the ATS scoring and resume-tailoring engine: a deterministic 100-point audit with 22 weighted checks, an AI rewrite validator that blocks invented employers/dates/metrics, and PDF link-annotation recovery that preserves every project, GitHub and certification URL — rendering across 22 ATS-safe templates without layout breakage.
- Integrated dual payment rails — Razorpay for domestic and Polar for international — and implemented usage quotas, plan gating and subscription lifecycle handling to monetise global user segments.
- Released a Chrome extension that tailors resumes directly on job postings across 15 job boards (LinkedIn, Indeed, Naukri, Greenhouse, Lever, Workday), reducing per-application tailoring time from ~10 minutes to under 60 seconds and automating end-to-end testing with Playwright.
- Instrumented platform reliability and growth telemetry with Sentry error monitoring, GA4 and PostHog analytics, transactional email via SMTP, and one-click portfolio publishing to Netlify to support user acquisition and observability.

Myntra E-commerce Website Clone / *html,css,javascript Live Demo↗ / GitHub↗* *mar 2025*

- Developed a frontend clone of the Myntra e-commerce platform, implementing product listings, navigation components,and interactive UI using HTML, CSS, and JavaScript.
- Added dynamic product browsing and cart features with DOM manipulation in JavaScript to enable real-time interactions and client-side state updates.
- Designed a responsive user interface with structured layouts and contemporary styling to match common responsive design requirements across device sizes.

Customer Behaviour Analytics / *Python, PowerBI, SQL, Excel GitHub↗* *January 2026*

- Conducted end-to-end data analysis in Python (Pandas) to clean and explore 3,900 transaction records, resolving inconsistent data and producing summary statistics to drive product decisions.
- Authored complex SQL queries to surface actionable insights such as high-spending discount users, average review ratings for top products, and revenue splits between subscribers and non-subscribers to inform targeted marketing.
- Built an interactive Power BI dashboard that visualised customer segments and purchasing patterns, revealing that 'Loyal' customers (3,116 individuals) generate the highest revenue and that express shipping correlates with a 3.5% higher average transaction value.
- Delivered data-driven recommendations by identifying top revenue-generating age groups and 5 discount-dependent products (e.g., 50% of Hat purchases used a discount) to optimize pricing and marketing strategies.

Education

Jadavpur University,kolkata *2023-2027*
Bachelor of Technology *CGPA - 7.5*

Basanti High School,kolkata *2021-2023*
Higher Secondary *percentage - 85%*

Leadership / Extracurricular

Core Member at Fin Club *june 2024 - jan 2026*

- Organised workshops on investment and financial planning that engaged 100+ university students, increasing club participation and financial literacy.
- Designed and delivered 10+ analytical and problem-solving challenges for technical-fest competitions, contributing to events that attracted 400+ participants.

Core Member at E-cell Club *May 2024 - jan 2026*

- Co-organised national-level events including E-Summit 2025 and Hult Prize 2025, supporting campaigns that achieved 3,500+ registrations and 800+ attendees.
- Evaluated 40+ startup pitch decks by assessing business ideas, innovation and presentation quality to select finalists and winners for competitions.

Certifications

- LeetCode SQL 50 Badge, LeetCode, 2025 | Google Drive↗
- Intership Trainee Certificate, Berger Paints , Rishra, 2026 | Certificate↗
