Education

Jadavpur University, Kolkata

Bachelor of Technology

Nov 2023 – Dec 2027

CGPA - 7.7

Basanti High School, Kolkata

Higher Secondary

Dec 2020 – Dec 2022

12th Marks - 96%

Experience

Jadavpur University CMATER Lab

Data Analyst Research Intern

May 2025 – Sep 2025

Kolkata

- Conducted exploratory data analysis (EDA) on 1,097 lung CT scan images across three classes (benign, malignant, normal), identifying class distributions and potential data imbalances to guide preprocessing strategies
- Designed and implemented image preprocessing pipelines including resizing to 224×224 pixels, pixel normalization, and stratified data splitting for robust model training and evaluation.
- Evaluated model generalization across three medical datasets (brain MRI, chest X-ray), achieving 95.54%–99.42% accuracy and demonstrating robust cross-domain feature transferability.

Projects

Myntra E-commerce Website Clone | *HTML, CSS, Javascript* 

March 2026

- Developed a frontend clone of the Myntra e-commerce platform, implementing product listings, navigation components, and interactive UI using HTML, CSS, and JavaScript.
- Built dynamic features such as product browsing and cart functionality using JavaScript with DOM manipulation for real-time user interactions.
- Designed a responsive user interface with structured layouts and modern styling to replicate real-world e-commerce website design patterns.

Customer Behaviour Analytics | *Python, PowerBI, SQL, Excel* 

January 2026

- Executed end-to-end data analysis using Python (Pandas) to clean and explore 3,900 transaction records, handling huge inconsistent data, and generating result statistics to inform business decisions.
- Performed complex data querying using SQL to extract actionable insights, including identifying high-spending discount users, calculating average review ratings for top products, and comparing revenue contributions between subscribers and non-subscribers to support targeted marketing strategies.
- Developed an interactive Power BI dashboard to visualize customer segments and purchasing patterns, revealing that "Loyal" customers (3,116 individuals) generate the highest revenue and that express shipping correlates with a 3.5% higher average transaction value compared to standard shipping.
- Delivered data-driven recommendations by identifying top revenue-generating age groups and 5 discount-dependent products (e.g., 50% of Hat purchases used a discount) to optimize pricing and marketing strategies.

TailorCV.ai | *HTML, CSS, Javascript* 

November 2025

- Designed and developed the frontend interface for an AI-powered resume optimization platform, creating responsive pages using HTML, CSS, and JavaScript for seamless user interaction.
- Built intuitive UI components for resume upload, job description input, and result display, enabling users to easily interact with the backend LLM-powered system.
- Integrated frontend with FastAPI backend APIs, contributing to a deployed product that attracted 50+ users within the first week of launch.

Technical Skills

Languages: Python, C, HTML, CSS, JavaScript, SQL

Developer Tools: VS Code, Google Cloud Platform

Technologies/Frameworks: PowerBI, Git, Data Structures and Algorithms, Excel, NumPy, Pandas, Matplotlib, Seaborn

Leadership / Extracurricular

- **Event Lead at Data Drift**, the data analytics event at Srijan: University's Annual Techno Fest - Developed problem statements, evaluated submissions, and supported end-to-end coordination, attracting 500+ participants from across the country.
- **Technical Lead at Corporate Clash** - Framed case studies and evaluated submissions. Generated 100+ registrations.
