Experience

Outlier — <i>Python Engineer</i>	May 2026 - Jun 2026 Remote
- Analyzed AI-generated Python code fixes across 50+ GitHub repositories, evaluating frontier LLM performance using a 10-metric rubric covering correctness, reasoning, code quality, and task completion. - Identified recurring failure patterns, including hallucinations, root-cause analysis errors, incomplete implementations, and code quality issues, contributing to a 15% improvement in model accuracy. - Reviewed and annotated Python coding tasks by assessing solution correctness, reasoning quality, and adherence to best coding practices, improving the consistency and reliability of LLM evaluation	
Berger Paints — <i>Engineering Trainee</i>	4 Jun 2026 - 4 Jul 2026 Rishra, Howrah
- Studied the end-to-end paint manufacturing process, gaining hands-on exposure to production planning, raw material handling, process optimization, and quality control practices. - Gained practical understanding of procurement, inventory management, and warehouse management systems (WMS), including material sourcing, stock control, warehouse operations, and supply chain. - Analyzed manufacturing and supply chain operations by observing chemical processes, documenting key operational insights, and preparing a comprehensive technical report with process flow analysis and recommendations	

Projects

Tailorcv.com — <i>Python, FastAPI, LLM, Javascript, PostgreSQL</i>	Feb 2026
Live Demo GitHub - Built and scaled an AI resume-optimization platform to over 20,000 users across 30+ countries, owning the full stack in Python/FastAPI on Neon PostgreSQL, including ATS scoring, AI mock interviews, resume tailoring, portfolio hosting and cover letters. - Built the core ATS scoring and resume-tailoring engine a deterministic 100-point audit across 22 weighted checks, an AI rewrite validated against the candidate's original document to block invented employers, dates, or metrics, and PDF link-annotation recovery that preserves every project, GitHub, and certification URL intact, rendering cleanly across 22 ATS-safe templates without layout breakage - Integrated dual payment rails to accommodate a global user base, utilizing Razorpay for domestic transactions and Polar for international, alongside managing usage quotas, plan gating, subscription lifecycle handling. - Shipped a Chrome extension that tailors resumes directly on job postings across 15 job boards (LinkedIn, Indeed, Naukri, Greenhouse, Lever, Workday), reducing per-application tailoring time from ~10 minutes to under 60 seconds. automated end-to-end testing with Playwright. - Instrumented the platform for reliability and growth with Sentry error monitoring, Google Analytics 4, and transactional email over SMTP, and one-click portfolio publishing to Netlify.	
Inventory Management System — <i>FastAPI, PostgreSQL</i>	Mar 2025
GitHub - Developed a scalable inventory management system with full CRUD operations and multi-field search over product data - Built RESTful APIs using FastAPI with asynchronous processing and automatic OpenAPI documentation - Designed normalized PostgreSQL schemas to ensure data integrity and optimize query performance - Integrated backend with frontend via Jinja2 templates and managed database interactions using SQLAlchemy / psycopg2	
Customer Behaviour Analytics — <i>Python, PowerBI, SQL, Excel</i>	January 2026
GitHub - Executed end-to-end data analysis using Python (Pandas) to clean and explore 3,900 transaction records, generating actionable statistics to inform business decisions. - Performed complex data querying using SQL to extract actionable insights, including identifying high-spending discount users, calculating average review ratings for top products, and comparing revenue contributions between subscribers and non-subscribers to support targeted marketing strategies. - Developed an interactive Power BI dashboard to visualize customer segments and purchasing patterns, revealing that 'Loyal' customers (3,116 individuals) generate the highest revenue and that express shipping correlates with a 3.5% higher average transaction value compared to standard shipping. - Delivered data-driven recommendations by identifying top revenue-generating age groups and 5 discount-dependent products (e.g., 50% of Hat purchases used a discount) to optimize pricing and marketing strategies	

Education

Jadavpur University, Kolkata — <i>Bachelor of Technology</i>	2023-2027 CGPA - 7.7
Basanti High School, Kolkata — <i>Higher Secondary</i>	2021-2023 Percentage - 85%

Skills

Languages: Python, HTML, CSS, JavaScript, SQL
AI/ML: Machine Learning, scikit-learn
Frameworks/Libraries: Flask, FastAPI, RESTful APIs, NumPy, Matplotlib, Seaborn, Pandas, SQLAlchemy
Databases: PostgreSQL, MySQL
Tools & Platforms: Git, Excel, Power BI, OpenAPI
Cloud & DevOps: AWS(Amazon Web Services)
Other Technical Skills: Data Structures and Algorithms

Certifications

- LeetCode SQL 50 Badge, LeetCode, 2025 | [Google Drive](#)
- Internship Trainee Certificate, Berger Paints, 2026 | [Certificate](#)

Leadership & Activities

Core Member — <i>Fin Club</i>	Jun 2024 - Jan 2026
- Planned and organized workshops on investment and financial planning, engaging over 100 university students and promoting financial literacy. - Designed 10+ analytical and problem-solving challenges for technical fest competitions, contributing to events with over 400 participants.	
Core Member — <i>E-cell Club</i>	May 2024 - Jan 2026
- Co-organized national-level events, including E-Summit 2025 and Hult Prize 2025, attracting over 3,500 registrations and 800+ attendees. - Evaluated 40+ startup pitch decks, assessing business ideas and presentation quality to support the selection of finalists and winners.
