Experience

Berger Paints *June 4, 2026 - July 4, 2026*
Engineering Trainee *Rishra, Howrah*

- Studied the complete paint manufacturing process, gaining hands-on experience in production planning, raw material handling, process optimization, and quality control practices.
- Acquired practical knowledge in procurement, inventory management, and warehouse management systems (WMS), focusing on material sourcing, stock control, and supply chain operations.
- Analyzed manufacturing and supply chain operations by documenting key chemical processes and preparing a detailed technical report with process flow analysis and actionable recommendations.

Outlier *May 2026 - June 2026*
Python Engineer *Remote*

- Evaluated AI-generated Python code fixes across 50+ GitHub repositories, assessing frontier LLM performance using a comprehensive 10-metric rubric that included correctness, reasoning, code quality, and task completion.
- Identified recurring failure patterns such as hallucinations and incomplete implementations, contributing to a 15% enhancement in model accuracy through root-cause analysis.
- Reviewed and annotated Python coding tasks by evaluating solution correctness and adherence to best coding practices, thereby improving the consistency and reliability of LLM evaluations.

Projects

TailorCV / *Python,HTML, CSS, JavaScript, FastAPI GitHub↗ / Live Demo↗* *February 2026*

- Engineered and scaled an AI resume-optimization platform to over 500 users across India managing the full stack in Python/FastAPI on Neon PostgreSQL, which included ATS scoring, resume tailoring, portfolio hosting, cover letters, and AI mock interviews.
- Developed the core ATS scoring and resume-tailoring engine, implementing a deterministic 100-point audit across 22 weighted checks, ensuring the integrity of candidate data by blocking invented employers, dates, or metrics.
- Integrated dual payment systems to accommodate a global user base, utilizing Razorpay for domestic transactions and Polar for international payments, alongside managing usage quotas and subscription lifecycle.
- Launched a Chrome extension that tailors resumes directly on job postings across 15 job boards (LinkedIn, Indeed, Naukri, Greenhouse, Lever, Workday), reducing per-application tailoring time from approximately 10 minutes to under 60 seconds, with automated end-to-end testing using Playwright.
- Instrumented the platform for reliability and growth through Sentry error monitoring, GA4 + PostHog analytics, transactional email via SMTP, and one-click portfolio publishing to Netlify.

Myntra E-commerce Website Clone / *HTML, CSS, JavaScript GitHub↗ / Live Demo↗* *March 2025*

- Developed a frontend clone of the Myntra e-commerce platform, implementing product listings, navigation components, and an interactive UI using HTML, CSS, and JavaScript.
- Created dynamic features such as product browsing and cart functionality using JavaScript with DOM manipulation for enhanced real-time user interactions.
- Designed a responsive user interface with structured layouts and modern styling to replicate real-world e-commerce website design patterns.

Customer Behaviour Analytics / *Python, Power BI, SQL, Excel GitHub↗* *January 2026*

- Executed comprehensive data analysis using Python (Pandas) to clean and explore 3,900 transaction records, addressing data inconsistencies and generating statistics to inform business decisions.
- Performed complex SQL queries to extract actionable insights, identifying high-spending discount users and comparing revenue contributions between subscribers and non-subscribers to support targeted marketing strategies.
- Developed an interactive Power BI dashboard to visualize customer segments and purchasing patterns, revealing that 'Loyal' customers (3,116 individuals) generate the highest revenue and that express shipping correlates with a 3.5% higher average transaction value compared to standard shipping.
- Delivered data-driven recommendations by identifying top revenue-generating age groups and 5 discount-dependent products (e.g., 50% of Hat purchases used a discount) to optimize pricing and marketing strategies.

Technical Skills

Languages: Python, HTML, CSS, JavaScript, SQL
AI/ML: Machine Learning, LLM, scikit-learn, TensorFlow
Frameworks/Libraries: FastAPI, NumPy, Matplotlib, Seaborn, Pandas
Databases: MySQL, PostgreSQL
Tools & Platforms: Git, Excel, Power BI
Other Technical Skills: Data Structures and Algorithms, Data Analysis

Education

Jadavpur University, Kolkata *2023-2027*
Bachelor of Technology *CGPA - 8.0*

Basanti High School, Kolkata *2021-2023*
Higher Secondary *Percentage - 85%*

Leadership / Extracurricular

Core Member at Fin Club *June 2024 - January 2026*

- Planned and organized workshops on investment and financial planning, engaging over 100 university students and promoting financial literacy.

Core Member at E-cell *May 2024 - January 2026*

- Co-organized national-level events, including E-Summit 2025 and Hult Prize 2025, attracting over 3,500 registrations and 800+ attendees.

Certifications

- LeetCode SQL 50 Badge, LeetCode, 2025 | Google Drive↗
- Internship Trainee Certificate, Berger Paints, 2026 | Certificate↗
