## Professional Summary

Detail-oriented Business Analyst with hands-on experience in data analysis, process optimization, and stakeholder engagement. Proven ability to translate business requirements into functional specifications and develop data-driven solutions. Strong analytical skills complemented by proficiency in SQL and data visualization tools, aiming to leverage expertise in driving data-informed decision-making and improving business processes. Skilled in mentoring and facilitation.

## Technical Skills

**Languages:** Python, HTML, CSS, JavaScript, SQL

**Frameworks/Libraries:** FastAPI, NumPy, Matplotlib, Seaborn, Pandas

**Databases:** MySQL, PostgreSQL, Oracle

**Tools & Platforms:** Git, Excel, Power BI, Tableau, Looker, SAP, Salesforce, Visio, Lucidchart

**Methodologies & Practices:** BRDs, user stories, wireframes, agile, waterfall, BPMN

## Experience

### Berger Paints

Engineering Trainee

4 jun, 2026 - 4 july, 2026

Rishra, Howrah

Link ↗

- Studied the end-to-end paint manufacturing process, gaining hands-on exposure to production planning, raw material handling, process optimization, and quality control practices.
- Gained practical understanding of procurement, inventory management, and warehouse management systems (WMS), including material sourcing, stock control, warehouse operations, and supply chain.
- Analyzed manufacturing and supply chain operations by observing chemical processes, documenting key operational insights, and preparing a comprehensive technical report with process flow analysis and recommendations.

### Outlier

Python Engineer

May 2026 to June 2026

Remote

- Analyzed AI-generated Python code fixes across 50+ GitHub repositories, evaluating frontier LLM performance using a 10-metric rubric covering correctness, reasoning, code quality, and task completion.
- Identified recurring failure patterns, including hallucinations, root-cause analysis errors, incomplete implementations, and code quality issues, contributing to a 15% improvement in model accuracy.
- Reviewed and annotated Python coding tasks by assessing solution correctness, reasoning quality, and adherence to best coding practices, improving the consistency and reliability of LLM evaluation.

## Projects

### Tailorcv.com | [html, css, javascript, FastApi](#) [Link ↗](#) | [GitHub ↗](#)

Feb 2026

- Built and scaled an AI resume-optimization platform to 16,000+ users across 30+ countries and 150+ daily active users, owning the full stack in Python/FastAPI on Neon PostgreSQL — ATS scoring, resume tailoring, portfolio hosting, cover letters, and AI mock interviews.
- Developed the core ATS scoring and resume-tailoring engine — a deterministic 100-point audit across 22 weighted checks, an AI rewrite validated against the candidate's original document to block invented employers, dates, or metrics, and PDF link-annotation recovery that preserves every project, GitHub, and certification URL intact — rendering cleanly across 22 ATS-safe templates without layout breakage.
- Integrated dual payment rails to serve a global user base — Razorpay for domestic customers and Polar for international — alongside usage quotas, plan gating, and subscription lifecycle handling.
- Shipped a Chrome extension that tailors resumes directly on job postings across 15 job boards (LinkedIn, Indeed, Naukri, Greenhouse, Lever, Workday), cutting per-application tailoring from ~10 minutes to under 60 seconds; automated end-to-end testing with Playwright.
- Instrumented the platform for reliability and growth with Sentry error monitoring, GA4 + PostHog analytics, transactional email over SMTP, and one-click portfolio publishing to Netlify.

### Myntra E-commerce Website Clone | [html, css, javascript](#) [Live Demo ↗](#) | [GitHub ↗](#)

mar 2025

- Developed a frontend clone of the Myntra e-commerce platform, implementing product listings, navigation components, and interactive UI using HTML, CSS, and JavaScript.
- Built dynamic features such as product browsing and cart functionality using JavaScript with DOM manipulation for real-time user interactions.
- Designed a responsive user interface with structured layouts and modern styling to replicate real-world e-commerce website design patterns.

### Customer Behaviour Analytics | [Python, PowerBI, SQL, Excel](#) [GitHub ↗](#)

January 2026

- Executed end-to-end data analysis using Python (Pandas) to clean and explore 3,900 transaction records, handling inconsistent data, and generating result statistics to inform business decisions.
- Performed complex data querying using SQL to extract actionable insights, including identifying high-spending discount users, calculating average review ratings for top products, and comparing revenue contributions between subscribers and non-subscribers to support targeted marketing strategies.
- Developed an interactive Power BI dashboard to visualize customer segments and purchasing patterns, revealing that 'Loyal' customers (3,116 individuals) generate the highest revenue and that express shipping correlates with a 3.5% higher average transaction value compared to standard shipping.
- Delivered data-driven recommendations by identifying top revenue-generating age groups and 5 discount-dependent products (e.g., 50% of Hat purchases used a discount) to optimize pricing and marketing strategies.

## Education

### Jadavpur University, kolkata

Bachelor of Technology

2023-2027

CGPA - 7.5

### Basanti High School, kolkata

Higher Secondary

2021-2023

percentage - 85%

## Leadership / Extracurricular

Core Member at Fin Club

june 2024 - jan 2026

- Planned and organized workshops on investment and financial planning, engaging 100+ university students and promoting financial literacy.
- Designed 10+ analytical and problem-solving challenges for technical fest competitions, contributing to events with 400+ participants.

Core Member at E-cell Club

May 2024 - jan 2026

- Co-organized national-level events, including E-Summit 2025 and Hult Prize 2025, attracting 3,500+ registrations and 800+ attendees.
- Evaluated 40+ startup pitch decks, assessing business ideas, innovation, and presentation quality to support the selection of finalists and winners.

## Certifications

- LeetCode SQL 50 Badge, LeetCode, 2025 | [Google Drive ↗](#)
- Internship Trainee Certificate, Berger Paints, 2026 | [My PDF ↗](#)
