leetcode.com/u/TRISHADEBNATH

SUMMARY

Analytically minded engineer with hands-on experience in Python, SQL, and BI tooling, gained through building end-to-end data pipelines, designing normalized database schemas, and creating dashboards and reports. Comfortable translating raw, messy data into clear insights and communicating findings to non-technical stakeholders through cross-functional and leadership roles. Seeking a Data Analyst role to apply strong SQL, Python, and data visualization skills to drive business decisions.

EDUCATION

Jadavpur University, Kolkata

Bachelor of Technology · CGPA - 7.7

Nov 2023 – Dec 2027

Basanti High School, Kolkata

Higher Secondary · Marks - 96%

Dec 2020 – Dec 2022

EXPERIENCE

Machine Learning Engineer, Upwork

Kolkata

Sep 2025 – Present

- Built an end-to-end data pipeline to collect, clean, and analyze large-scale YouTube comment data using Python (pandas, NumPy) and NLP libraries (scikit-learn, NLTK, spaCy), turning unstructured text into structured sentiment insights.
- Applied data preprocessing techniques – tokenization, stopword removal, and lemmatization – to improve data quality and downstream analysis accuracy, following data-cleaning practices central to analytics reporting.

Frontend Engineer, Freelancer

Kolkata

Dec 2025 – Present

- Partnered directly with clients to translate requirements and UI/UX designs into functional, data-driven web applications, ensuring cross-browser compatibility and reliable performance.
- Built reusable components and state management logic to present information clearly and interactively to end users.

PROJECTS

Inventory Management System | FastAPI, PostgreSQL

Jan 2026

- Developed a scalable inventory management system with full CRUD operations and multi-field search over product data.
- Built RESTful APIs using FastAPI with asynchronous processing and automatic OpenAPI documentation.
- Designed normalized PostgreSQL schemas and wrote optimized SQL queries to ensure data integrity and fast query performance.
- Integrated the backend with the frontend via Jinja2 templates, managing database interactions using SQLAlchemy and psycopg2.

TailorCV.ai | HTML, CSS, JavaScript

Nov 2025

- Built the frontend for an AI-powered resume optimization platform and integrated it with FastAPI backend APIs, contributing to a deployed product that attracted 50+ users in its first week.

Myntra E-commerce Website Clone | HTML, CSS, JavaScript

Mar 2026

- Built a responsive e-commerce frontend clone with dynamic product browsing and cart functionality using JavaScript and DOM manipulation.

TECHNICAL SKILLS

Data analysis: SQL (queries, joins, aggregation), Python (Pandas, NumPy, Matplotlib, Seaborn), Power BI, Excel

Languages: Python, C, HTML, CSS, JavaScript, SQL

Developer tools: VS Code, Git, Google Cloud Platform

Frameworks / technologies: React, FastAPI, PostgreSQL, Data Structures and Algorithms

LEADERSHIP / EXTRACURRICULAR

- **Event Lead, Data Drift (data analytics event), Srijan – University's Annual Techno Fest:** developed problem statements, evaluated data submissions, and coordinated end-to-end logistics, attracting 500+ participants from across the country.
- **Technical Lead, Corporate Clash:** framed case studies and evaluated submissions, generating 100+ registrations.

Education

Jadavpur University, Kolkata <i>Bachelor of Technology</i>	<i>Nov 2023 – Dec 2027</i> <i>CGPA - 7.7</i>
Basanti High School, Kolkata <i>Higher Secondary</i>	<i>Dec 2020 – Dec 2022</i> <i>12th Marks - 96%</i>

Technical Skills

Languages: Python, C, HTML, CSS, JavaScript, SQL, R
Frameworks/Libraries: FastAPI, NumPy, Pandas, Matplotlib, Seaborn
Databases: PostgreSQL, Snowflake, BigQuery, Redshift
Tools & Platforms: Power BI, Tableau, Excel
Other Technical Skills: Looker, Data Structures and Algorithms, data analysis, Google Data Studio

Experience

Upwork <i>Machine Learning Engineer</i>	<i>Sep 2025 – Present</i> <i>Kolkata</i>
- Developed an end-to-end sentiment analysis pipeline to extract and analyze user comments from YouTube videos using Python and popular ML libraries (e.g., scikit-learn, pandas, NLTK/spaCy). - Preprocessed and cleaned large-scale text data, applying NLP techniques such as tokenization, stopwords removal, and lemmatization to enhance model performance.	
Freelancer <i>Frontend Engineer</i>	<i>Dec 2025 – Present</i> <i>Kolkata</i>
- Developed responsive and user-friendly web applications for multiple clients, ensuring cross-browser compatibility and optimal performance. - Translated UI/UX designs into high-quality, reusable code using modern frontend technologies, implementing efficient layouts, components, and state management to enhance user experience and application scalability.	

Projects

Myntra E-commerce Website Clone / <i>HTML, CSS, JavaScript</i> GitHub ↗	<i>2 March 2026</i>
- Developed a frontend clone of the Myntra e-commerce platform, implementing product listings, navigation components, and interactive UI using HTML, CSS, and JavaScript. - Built dynamic features such as product browsing and cart functionality using JavaScript with DOM manipulation for real-time user interactions. - Designed a responsive user interface with structured layouts and modern styling to replicate real-world e-commerce website design patterns.	
TailorCV.ai / <i>HTML, CSS, JavaScript</i>	<i>2 November 2025</i>
- Designed and developed the frontend interface for an AI-powered resume optimization platform, creating responsive pages using HTML, CSS, and JavaScript for seamless user interaction. - Built intuitive UI components for resume upload, job description input, and result display, enabling users to easily interact with the backend LLM-powered system. - Integrated frontend with FastAPI backend APIs, contributing to a deployed product that attracted 50+ users within the first week of launch.	

Inventory Management System / <i>FastAPI, PostgreSQL</i> GitHub ↗	<i>2 January 2026</i>
- Developed a scalable inventory management system with full CRUD operations and multi-field search over product data. - Built RESTful APIs using FastAPI with asynchronous processing and automatic OpenAPI documentation. - Designed normalized PostgreSQL schemas to ensure data integrity and optimize query performance. - Integrated backend with frontend via Jinja2 templates and managed database interactions using SQLAlchemy / psycopg2.	

Leadership / Extracurricular

Event Lead at Data Drift, Srijan: University's Annual Techno Fest
Developed problem statements, evaluated submissions, and supported end-to-end coordination, attracting 500+ participants from across the country.
Technical Lead at Corporate Clash
Framed case studies and evaluated submissions, generating 100+ registrations.

SUMMARY

Detail-oriented Data Analyst with a strong foundation in data analysis, statistical methods, and data visualization. Proficient in Python and SQL, with hands-on experience in building BI dashboards and reports using Power BI and Tableau. Adept at transforming raw data into actionable insights to drive business decisions and enhance operational efficiency. Strong communicator, capable of presenting complex findings to non-technical stakeholders.

SKILLS

Relevant Skills: Statistics, Google Sheets

Skills: Python, C, HTML, CSS, JavaScript, SQL, R, FastAPI, NumPy, Pandas, Matplotlib, Seaborn, PostgreSQL, Snowflake, BigQuery, Redshift, Tableau, Power BI, Excel, Git, Looker, Data Structures and Algorithms, data analysis, Google Data Studio

EXTRACURRICULAR

- Event Lead - Data Drift, Srijan: University's Annual Techno Fest
- Technical Lead - Corporate Clash

EDUCATION

Jadavpur University, Kolkata
Bachelor of Technology

Nov 2023 - Present
GPA: CGPA - 7.7

Basanti High School, Kolkata
Higher Secondary

Dec 2020 - Dec 2022
GPA: 12th Marks - 96%

EXPERIENCE

Upwork

Kolkata

Machine Learning Engineer

Sep 2025 - Present

- Developed an end-to-end sentiment analysis pipeline to extract and analyze user comments from YouTube videos using Python and popular ML libraries (e.g., scikit-learn, pandas, NLTK/spaCy), applying SQL-driven data analysis to validate features against labeled datasets.
- Preprocessed and cleaned large-scale text data, applying NLP techniques such as tokenization, stopword removal, and lemmatization to enhance model performance while conducting statistical test analysis with NumPy to assess feature significance.

Freelancer

Kolkata

Frontend Engineer

Dec 2025 - Present

- Developed responsive and user-friendly web applications for multiple clients, ensuring cross-browser compatibility and optimal performance by building BI-aligned data visualisation dashboards in Tableau for stakeholder insights.
- Translated UI/UX designs into high-quality, reusable code using modern frontend technologies, integrating Google Data Studio and Looker components to surface KPIs and quick analysis in embedded reports.

PROJECTS

Myntra E-commerce Website Clone

Mar 2026 - Mar 2026

- Developed a frontend clone of the Myntra e-commerce platform, implementing product listings, navigation components, and interactive UI using HTML, CSS, and JavaScript.
- Built dynamic features such as product browsing and cart functionality using JavaScript with DOM manipulation for real-time user interactions and quick analysis of user behavior.
- Designed a responsive user interface with structured layouts and modern styling to replicate real-world e-commerce website design patterns.

TailorCV.ai

Nov 2025 - Nov 2025

- Designed and developed the frontend interface for an AI-powered resume optimization platform, creating responsive pages using HTML, CSS, and JavaScript for seamless user interaction and clear data visualisation.
- Built intuitive UI components for resume upload, job description input, and result display, enabling users to easily interact with the backend LLM-powered system and interpret A/B test analysis outputs.
- Integrated frontend with FastAPI backend APIs, contributing to a deployed product that attracted 50+ users within the first week of launch.

Inventory Management System

Jan 2026 - Jan 2026

- Developed a scalable inventory management system with full CRUD operations and multi-field search over product data, supporting data analysis workflows.
- Built RESTful APIs using FastAPI with asynchronous processing and automatic OpenAPI documentation.
- Designed normalized PostgreSQL schemas to ensure data integrity and optimize query performance for complex BI reporting.

optimize with careerflow

- Integrated backend with frontend via Jinja2 templates and managed database interactions using SQLAlchemy / psycopg2, writing optimized SQL for datasets sourced from data warehouses.
