Experience

Alignerr *Jan 2026 – Apr 2026*
Machine Learning Engineer *Remote*

- Evaluated frontier large language model (LLM) code fixes across 100+ GitHub repositories with a 15-metric rubric covering correctness, reasoning, and code quality.
- Detected recurring model failures—hallucinations, root-cause analysis failures, incomplete task execution, and code quality issues—contributing to a 10% project metric improvement.
- Annotated and assessed 100+ airline pilot speech data rows, identifying aviation-specific terminology and action words to strengthen training data quality for speech AI models.

Berger Paints *June 2026 – July 2026*
Engineering Trainee *Rishra, India*

- Mapped the end-to-end paint manufacturing process, covering production planning, raw material handling, process optimization, and quality control practices.
- Examined procurement, inventory management, and warehouse management systems (WMS), including material sourcing, stock control, warehouse operations, and supply chain processes.
- Documented chemical processes and operational insights from manufacturing and supply chain observations, then prepared a comprehensive technical report with process flow analysis and recommendations.

Projects

TailorCV *| Python, FastAPI, LLM, Javascript, PostgreSQL GitHub↗ | Live Demo↗* *2 January 2026*

- Co-developed and scaled TailorCV to 20,000+ users across 30+ countries and 200+ daily active users, building its AI resume optimization engine, Chrome extension, cover letter generator, and resume-to-portfolio website builder in Python and FastAPI on Neon PostgreSQL.
- Engineered TailorCV's resume-tailoring engine with factual-accuracy-focused AI rewrites and PDF link-annotation recovery that preserves every project, GitHub, and certification URL, rendering resumes cleanly across 22 ATS-safe templates without layout breakage.
- Built TailorCV's international payment system on Polar, with region-based USD pricing across 30+ countries, fair pricing for low-income markets, and verified webhooks that handle the full subscription lifecycle, from activation and renewal to cancellation.
- Shipped a Chrome extension that tailors resumes on job postings across 15 job boards (LinkedIn, Indeed, Naukri, Greenhouse, Lever, Workday), reducing per-application tailoring from 10 minutes to under 60 seconds.
- Built TailorCV's email system on Amazon SES, sending first-use onboarding emails and segmented re-engagement campaigns through a secure localhost-only , with signed unsubscribe links and duplicate-safe sending.

Youtube Sentiment Analysis *| TensorFlow, NLP, AWS EC2, Scikit-learn GitHub↗ | Google Drive↗* *2 October 2025*

- Engineered a Flask REST API for real-time sentiment predictions and word-cloud visualizations, connecting a Chrome extension client through JSON I/O and CORS for cross-origin requests.
- Trained and evaluated a LightGBM sentiment classifier on 37,800 labeled YouTube comments, reaching 78% test accuracy across 3 sentiment classes through TF-IDF (1,3-gram) feature engineering.
- Orchestrated an ingestion → preprocessing → training → evaluation pipeline with DVC and an MLflow model registry on AWS EC2, versioning models for reproducible inference across 6 tracked experiments.

Marketing Analytics *| Python, Excel, SQL, PowerBI, Data Visualization GitHub↗* *Mar 2026 - Apr 2026*

- Consolidated marketing data from multiple sources, including CSV files and SQL databases, to maintain data consistency and accuracy.
- Analyzed customer opinions, engagement trends, and campaign effectiveness using Python for in-depth data and sentiment analysis.
- Developed an interactive Power BI dashboard to visualize key performance indicators and support data-driven marketing decisions and actionable business insights.

Education

Jadavpur University *Nov 2023 – Dec 2027*
Bachelor of Technology *CGPA: 7.6*

Hariyana Vidya Mandir *Apr 2020 – Apr 2022*
Higher Secondary *Percentage: 90%*

Technical Skills

Languages: Python, SQL, JavaScript, HTML, CSS
AI/ML: Machine Learning, Deep Learning, Natural Language Processing (NLP), LLM, GPT, RAG, TensorFlow, PyTorch, scikit-learn, Langchain, MLflow, LightGBM, DVC
Frameworks/Libraries: FastAPI, Flask, SQLAlchemy, Matplotlib, Pandas, NumPy, Streamlit
Databases: MySQL, PostgreSQL, Chroma DB
Tools & Platforms: Power BI, Excel, Git, OpenAPI, GA4
Cloud & DevOps: Amazon Web Services (AWS), EC2, S3, ECS, Docker, CI/CD, Linux
Other Technical Skills: REST APIs, Data Structures and Algorithms

Leadership / Extracurricular

Core Member at Entrepreneurship Cell, Jadavpur University *May 2024 – Jan 2026*

- Co-organized national entrepreneurship events E-Summit 2025 and Hult Prize 2025, engaging 5,000+ registrants and 1,000+ participants.

Core Member at FinClub, Jadavpur University *June 2024 – Jan 2026*

- Organized workshops on investment, financial planning, and market fundamentals for 100+ students, supporting data-driven financial decision-making.

Certifications

- Leetcode SQL 50, Leetcode, 2025 | Google Drive↗
- Internship Training Certificate, Berger Paints Rishra, 2026 | Google Drive↗
